

Hardscapes & Retaining Walls

The addition of a beautiful stone patio and barbeque, a firepit, or a tiered retaining wall can completely transform "dead" space into useable living space. Hardscape materials like Flagstone, can help create a lovely garden accent or a grand outdoor staircase. Many natural stones, concrete blocks and timbers are readily available in a variety of shapes and colors to border plant beds and tree rings, and to provide a more "finished" outdoor decor.

Carefully selected hardscape materials are used to create a look that suits the style of your property, whether it is traditional or modern, urban or country.

Choosing the appropriate materials and a complimentary design will create a long-lasting impression and give your property a personality all its own.

Groundcover

Premium Hardwood Mulch is highly recommended for plant beds and tree rings. Made from a combination of hardwood and bark, it will naturally decompose to help prevent insects and weeds.

Color-Enhanced Hardwood Mulch (in Red, Brown, & Black) is perfect for decorative landscaping to add a splash of color.

Other Groundcover

Topsoil Playground Mulch
Bark Mushroom Compost
Rock Stone Gravel Sand

Seasonal Services

Every season Old Man Winter takes a toll on what was once beautifully green, lush, well-manicured, and pleasant to the eye. Whether you need Fall Clean-Up to remove fallen leaves, debris, and broken branches OR you are trying to revive your property in the early Spring, we can make it happen with ease.

Core Aeration - Aeration pulls "plugs" from your lawn to open the soil and allow more water, air, and nutrients in. This helps to control and reduce thatch build-up, promotes deeper, healthier roots, and provides a more accepting environment for seed germination.

Dethatching - Heavy-duty commercial-grade power rakes are used to remove dead thatch from your lawn and to promote healthier grass growth. The best results are typically achieved in early Spring before pre-emergent fertilization.

Seeding/Sod Installation - Seeding services and sod installation are available to rejuvenate areas where grass has been damaged or removed during construction. Consult one of our experts to see which method is recommended for troubled areas of your lawn.

Plowing and Salting - JAMESON can serve your winter needs with our FULL SERVICE snowplowing, salting, and shoveling crews. We work around the clock to keep the property ground conditions clean and safe with the use of commercial plows, salt spreaders, and deicing agents.

Landscape Design

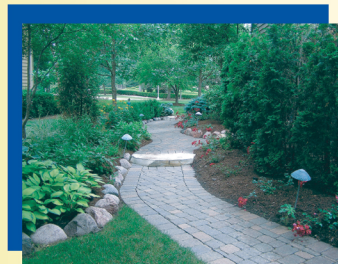

We understand that each property should have its own unique style and personality and we are ready to help your property reach its potential. If you are looking to create a calming garden retreat in your backyard or your business needs to aesthetically enhance the property entrance or parking area, we can be of service. The appearance of your property makes the first impression on everyone that visits whether for personal, recreational, or business reasons - so make it a good one. Get the advice of one of our experts to achieve the results you never dreamed were possible.

Lawn & Landscape Maintenance

Our landscape and lawn maintenance crews will work meticulously to keep your property well-maintained with the following services:

- o Mow
- o Edge Walks/Beds/Tree Rings
- o Cultivate & Maintain Beds
- o Trim Bushes & Shrubs
- o Prune & Trim Trees
- o Remove Debris & Dead Plants

Lawn & Landscape Improvements

Fertilization - Pre-emergent fertilizers in early Spring help to promote greener, thicker growth and a stronger root system. A granular fertilizer is typically used for Summer maintenance. Although results may vary, most lawns will improve within 2 weeks. Regular fertilization treatments will further improve the condition from year to year.

Weed Control - We recommend applying weed treatment with each granular fertilization. This Weed & Feed method promotes healthy turf-grass, controls future weed growth, and minimizes the use of spray chemicals to eliminate only isolated existing weeds.

Planting Services - We work diligently to find the highest quality materials. Since soil content can vary from region to region, we only purchase our planting materials from well-known nurseries in our local market that sell certified disease-free plants. In addition, we will always carefully Hand-Select appropriately sized plant-life to ensure that it suits the property, survives, and flourishes beautifully.
